

## 08- Inserting our Page Logo

---

### INSERTING OUR PAGE LOGO

```
8      <div id="container">
9          <div class="banner">
10             
11          </div><!--End of Banner-->
12      <div class="logo">
13          
14      </div><!--End of Logo-->
15  </div><!--End of container-->
```

This tells the browser where it can find the image file

#### Note:

The `<img>` element is used to add image to a page.

The `<img>` element is also an empty element.

```
6  #container{
7      width:960px;
8      background:#fff;
9      margin:0px auto;
10 }
11
12
13 .logo img{
14     width:125px;
15     float:left;
16 }
```

This type of CSS selector is called **descendant selector**.

## 08- Inserting our Page Logo

---

### Note:

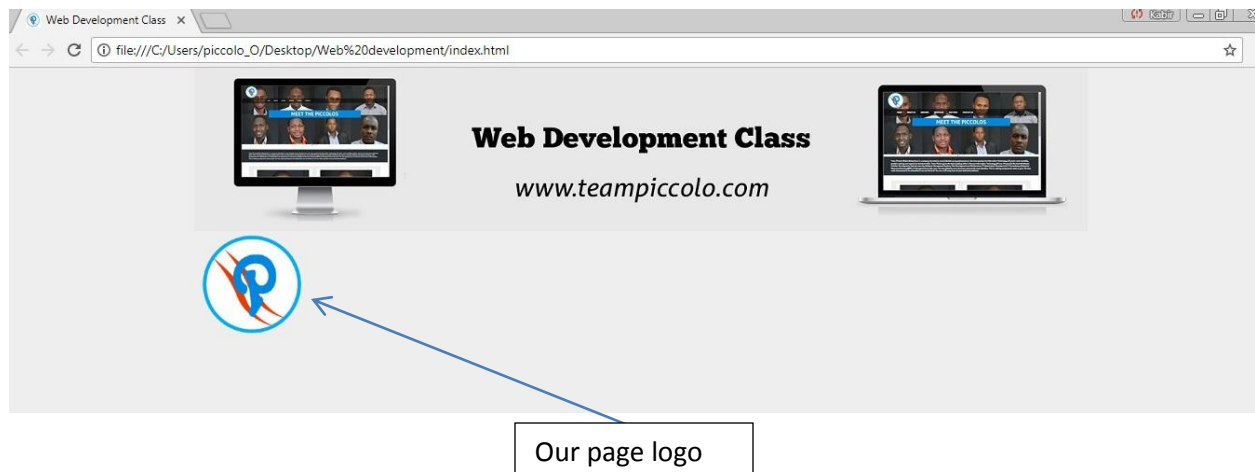

**Descendant Selector** in CSS: matches an element that is a descendant of another specified element. For example:

**.logo img { }**

Targets any **<img>** elements that sit inside the **class logo**

The **float** property allows you to take an element in normal flow and place it as far to the left or right of the containing element as possible.

When you use the **float** property, you should also use the **width** property to indicate how wide the floated element should be.

### HTML ELEMENTS LEARNT

<b>&lt;img&gt;</b>	<b>&lt;div&gt;</b>	<b>&lt;html&gt;</b>	<b>&lt;head&gt;</b>	<b>&lt;title&gt;</b>
<b>&lt;link&gt;</b>	<b>&lt;body&gt;</b>			

### CSS PROPERTIES LEARNT

<b>float</b>	<b>margin-right</b>	<b>margin-left</b>	<b>margin-bottom</b>	<b>margin-</b>
<b>top</b>	<b>margin</b>	<b>width</b>	<b>background</b>
