

### The GROUP BY clause in MySQL

The **GROUP BY** clause is used in a **SELECT** statement to group records from a table on the basis of one or more columns.

The **GROUP BY** clause is mostly combined with aggregate functions to generate summary value.

```
Run SQL query/queries on database voting_system: ?
SELECT cust_name, COUNT(*) AS user_count FROM cust_book_details GROUP BY cust_name
```

The GROUP BY clause

cust_name	user_count
Kabir Yusuf Bashir	5
Mansur Usman Terrang	5
umar	1
