

THE display PROPERTY

Note:

- 1) **inline**: this causes a block-level element to act like an inline element.
- 2) **block**: this causes an inline element to act like a block-level element.
- 3) **inline-block**: this causes a block-level element to flow like an inline element, while retaining other features of a block level element.
- 4) **none**: this hides an element from the page.
