

The border property

- a) **border-width:** the border-width property is used to control the width of a border. The value can either be given in pixels or using one the following values:

- thin
- medium
- thick

NB: You cannot use percentages with this property

- border-top-width: 2px;**
- border-right-width: thin;**
- border-bottom-width: medium;**
- border-left-width: thick;**

- b) **border-style:** you can control the style of a border using the border-style property. This property can take the following values

- solid
- dotted
- dashed
- double
- groove
- ridge
- inset

029- The border property

- outset
- hidden/none

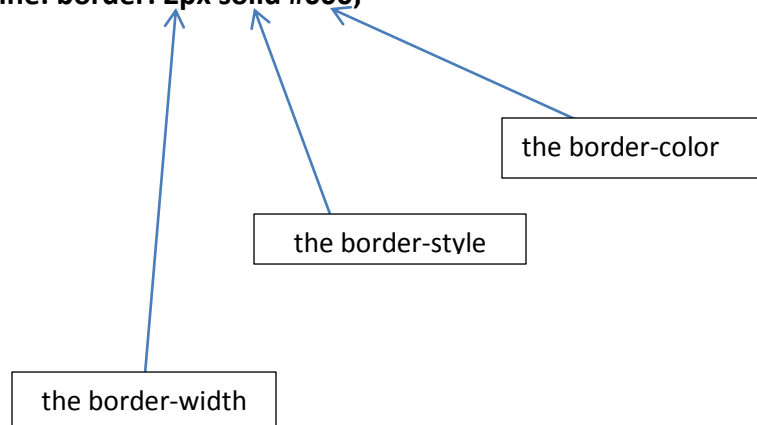

You can individually change the style by:

- border-top-style: none;**
- border-left-style: groove;**
- border-right-style: dotted;**
- border-bottom-style: solid;**

c) **border-color:** you can specify the color of a border.

- border-top-color: black;**
- border-right-color: #161616;**
- border-left-color: #eeeeee;**
- border-bottom-color: pink;**

Or you can write it on a single line: **border: 2px solid #000;**

029- The border property

```
116 .col-one-third{
117     width:29.33333333333333%;
118     float:left;
119     background:yellow;
120     height:130px;
121     margin-right:2%;
122     margin-left:2%;
123     margin-bottom:2%;
124 }
125
126 .col-quarter{
127     width:21%;
128     float:left;
129     margin-right:2%;
130     margin-left:2%;
131     margin-bottom:2%;
132 }
133
134 .col-quarter img{
135     width:100%;
136     border:5px solid #000;
137 }
138
```
