

013- The marquee element

THE marquee ELEMENT

Note:

The **<marquee>** element is used to create a scrolling text or an image.

The **<marquee>** element has some attributes:

- a) direction: the direction can be either of the four values; up, down, left or right.
- b) scrollamount: the speed of the scrolling text or image.
- c) behavior: the behavior can be either of the three values; slide, scroll or alternate.

```
21 <div class="latest_update">
22   <marquee direction="left" scrollamount="4" behavior="scroll">
23     <span>013- The marquee element &nbsp;&nbsp;&nbsp;</span>
24     <span>012- The span element &nbsp;&nbsp;&nbsp;</span>
25     <span>011- The padding property &nbsp;&nbsp;&nbsp;</span>
26     <span>010- The float property &nbsp;&nbsp;&nbsp;</span>
27   </marquee>
28 </div>
29 </div>
```

The marquee element

For more details on the **<marquee>** element, please refer to the video **013- the marquee element** on my Web Development Video series.
