

THE border-radius PROPERTY

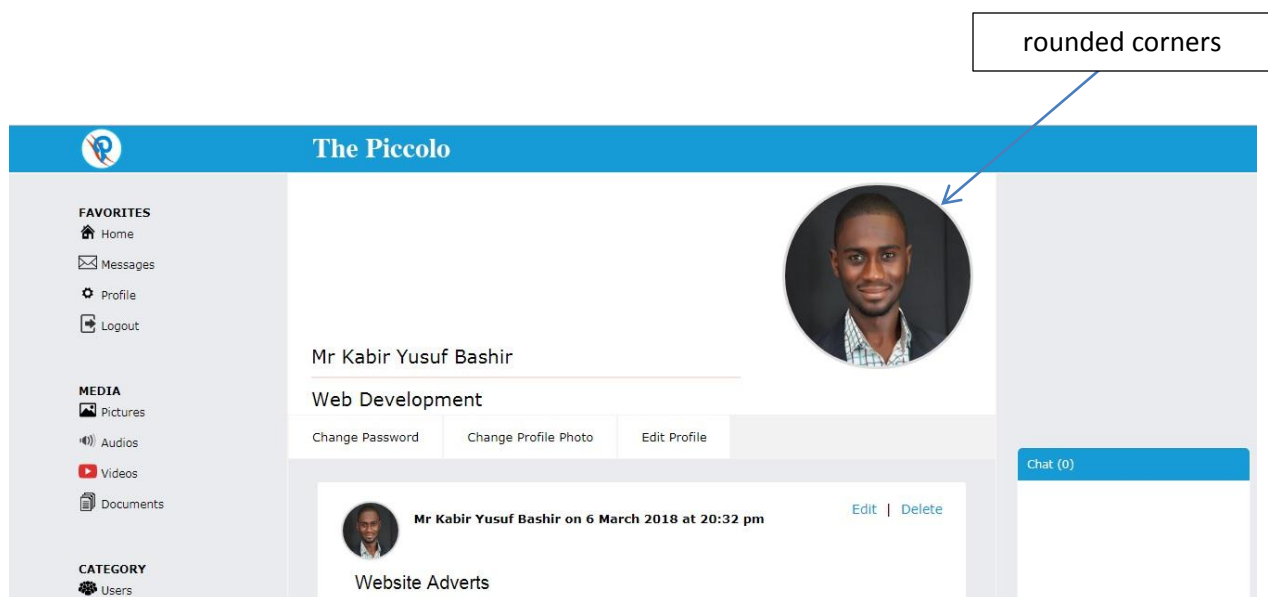

The **border-radius** was introduced in CSS3.

The **border-radius** is used to create rounded corners on any box.

Like in our **Membership Management System**, the **border-radius** property was assigned to the profile pictures; this makes the image to have rounded corners.

You can view our **Membership Management System** on our website

<http://www.teampiccolo.com/portfolio>

Note:

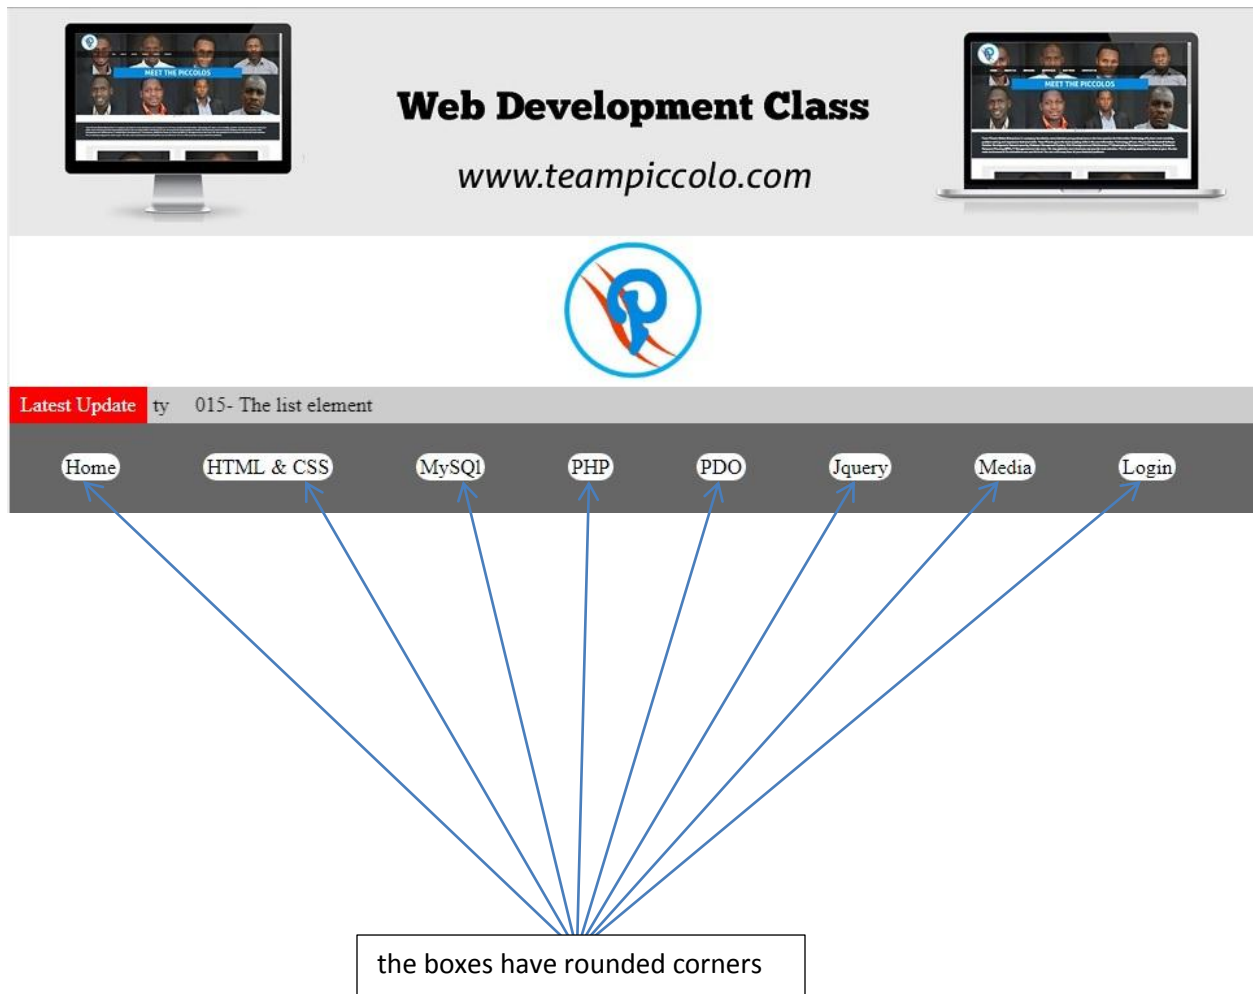

The **border-radius** has some values:-

- 1) **border-top-right-radius**
- 2) **border-top-left-radius**
- 3) **border-bottom-right-radius**
- 4) **border-bottom-left-radius**

018- The border-radius property

```
55 nav ul li a{  
56     background:#fff;  
57     color:#000;  
58     text-decoration:none;  
59     padding:2px 3px;  
60     border-radius:20px;  
61 }
```

border-radius
