USING THE <img> ELEMENT

The title of the image

Provides a text description of the image

```
 8      <div id="container">
 9          <div class="banner">
10              <img src="./images/banner.jpg" alt="Banner of Web Development Class" title="Banner" />
11          </div><!--End of Banner-->
12      </div><!--End of container-->
13  </body>
```

This tells the browser where it can find the image file

Note:

The <img> element is used to add image to a page.

The <img> element is also an empty element.

When you hover over the image, the title of the image appears

HTML ELEMENTS LEARNT

<img>	<div>	<html>	<head>	<title>
