# THE float PROPERTY

Note:

The float property positions the columns next to each other.

The property can take one of the two values:

    a) **left**: this indicates that the column should float to the left.
    b) **right**: this indicates that the column should float to the right.

```
17    <div class="row">
18        <div class="title">
19            Latest Update
20        </div>
21        <div class="latest_update">
22            010- The float property
23        </div>
24    </div>
```

```
27    .title{
28        width:11%;
29        background:red;
30        float:left;
31    }
32
33    .latest_update{
34        width:89%;
35        background:#ccc;
36        float:left;
37    }
38
```

float

The first div (title) and the second div (latest_update) appears on the same line
