THE <div> ELEMENT

Note:

The **<div>** element allows you to group a set of elements together.

The **<div>** element makes it easier to follow your code to hold each section of the page.

Since you will be using several elements inside a **<div>** element, you can add a comment after the closing **</div>** tag.

 For example

> **<div id="container">**
>
> **</div><! -- end of container -->**

HTML ELEMENTS LEARNT

<div>	**<html>**	**<head>**	**<title>**	**<link>**
<body>				

CSS PROPERTIES LEARNT

margin   **background**
